

Title:	How to call indoor station and hik-connect by access controller						
Product model:	DS-K1T501SF/DS-KH6310	Document version:	2018/11/15				

Preparation

- ✓ IVMS4200 version: V2.7.2.7 build180919
- ✓ DS-K1T501SF firmware version: V1.1.0 build181115
- ✓ DS-KH6310 firmware version: V1.5.0 build180622

Introduction to Function

- \checkmark Press call button on the access controller to call the indoor station and hik-connect
- ✓ Long press call button to call IVMS4200
- \checkmark Answer and open door by hik-connect and indoor station

How to call indoor station and hik-connect by access controller

1) Add the devices to IVMS-4200

Adding Mode:									
IP/Domain	IP Segment	Clould P2	2P 🔘 EHome	Serial Port					
 IP Server 	Hiddns	O Batch Im	port						
Add Offline Device									
	Nickname:		KH6310						
	Address:		10.7.114.228						
	Port:		8000						
	User Name:		admin						
	Password:		•••••						
Adding Mode:									
IP/Domain	IP Segment	O Clould F	2P O EHome	O Serial Port					
O IP Server	HiDDNS Batch Import								
Add Offline D)evice								
	Nickname:		K1T501SF						
	Address:		10.7.114.180						
	Port:		8000						
	User Name: admin								
	Password:								
	Synchronize Device Time								
	Export to Gr	Export to Group							
	Set the device name as the group name and add all the channels connected to the device to the group.								

2) Add the access controller to hik-connect

1. Scan the QR code on the back of DS-K1T501.

Advanced Settings	Save	

5) Card verification

Special function: when card authentication fails, the access controller calls the indoor station automatically.

You can trigger this function by enable "locking door when door closed". Click the door name. Enter "Yes".
